EDUCATION

MSc in Big Data Analytics (SCGPA : 8.68) Sept 2024 - Present
St Aloysius Institute of Management & Information Technology

Bachelors Of Computer Applications (CGPA : 8.76) Oct 2021 - Jul 2024
SDM College Of Business Management

SKILLS

TECHNICAL SKILLS
Languages: Python, SQL, DAX
Technologies & Tools: Power BI, Tableau, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook, Google Colab, Machine Learning (ML)

SOFT SKILLS
- Working cross-functionally with marketing, finance, and engineering teams
- Participating in brainstorming sessions to improve processes
- Managing multiple data analysis projects and meeting deadlines
- Balancing long-term strategic insights with urgent business needs

PROJECTS

- **Crop Profit Prediction Using Machine Learning**

Technologies: Python, Flask, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Joblib
Built a web-based agricultural decision support system that predicts crop profitability using historical yield and market price data from Karnataka (2015–2025). Preprocessed and integrated two datasets comprising 19,000+ records, applying label encoding and feature engineering to derive 15 input features. Trained and compared multiple regression models — Linear Regression, Decision Tree, Random Forest, and XGBoost — evaluating performance using MSE, RMSE, and R^2 score, achieving an R^2 of ~0.97 with the best-performing model. Deployed the system as a Flask web application enabling farmers to input crop type, district, season, and cultivation details to receive real-time yield, price, and profit predictions.

- **Nike E-Commerce Data Analysis**

Tools: Power BI, DAX
Extracted and analyzed product, pricing, and sentiment data; developed an interactive Power BI dashboard using advanced slicers and DAX to explore market trends and discount patterns.

GitHub Link : NIKE-interactive-dashboard-

- **Disease Prediction App using Prompt Engineering**

Technologies: Python, Flask, Machine Learning, ChatGPT
Developed a disease prediction system (Pima Indians Diabetes Dataset) using a trained ML model, deployed as a Flask web application. Leveraged Prompt Engineering with ChatGPT to rapidly debug, generate code and refine Python code and HTML templates, showcasing Generative AI proficiency.

- **Blinkit Dashboard**

Category: Sales and Customer Insights Project **Tools:** Power BI
Description: Designed an interactive dashboard for sales performance, customer behavior, and trends using Power Query and DAX.
GitHub Link : BlinkIT-Dashboard

- **HR Dashboard**

Category: HR Dashboard and Reporting Project
Tools: Power BI
Description: Created an HR analytics dashboard to track headcount, attrition, department distribution, and hiring trends.
GitHub Link : HR-Analytics-Dashboard

- **Sales Performance Analysis Dashboard**

Category: Business Intelligence / Data Visualization
Tools: Power BI, DAX, Excel
Description: Analyzed Adidas product sales across month, state, product, and retailer with charts and maps.
GitHub Link : Addidas-Dashboard

- **Tourism Package Management**

Category: Web application and MySQL
Tools: Visual Studio Code, PHP, XAMPP, MySQL
Description: Identifying potential tourist destinations, developing tourism products, managing booking systems, ensuring safety, and analyzing trends.

TECHNICAL WORKSHOPS AND CERTIFICATIONS

- Robotics & AI Workshop: Built a Raspberry Pi-powered robotic hand integrating AI-driven motion planning and hardware control algorithms.
- Basics of Python – Infosys Springboard (2 hours)
- Computing in R Studio – Infosys Springboard (4 hours)
- Statistical Analysis in R – Infosys Springboard (3 hours)
- Big Data – Cognitive Class (3 hours)
- Leadership and Teamwork – Cognitive Class (1 hour)

EXTRA CURRICULAR ACTIVITIES

- Head of Quiz Event in INSPIRE and SYGMA (Inter-college fests): Organized and conducted quiz contests.
- 1st place in divisional-level cricket tournament (U-16)
- Represented college in intercollegiate cricket & volleyball tournaments
- Participated in coding, surprise, and gaming events
